About me

Computer Science graduate with hands-on experience in software engineering, machine learning, data analytics, and AI-powered application development. Skilled in designing full-stack web applications, developing predictive machine learning models, integrating Generative AI solutions, and building data-driven systems that solve real business problems. Proficient in JavaScript, Python, PHP, SQL, and modern AI development tools. Passionate about building scalable software and continuously learning emerging technologies.

Education

Bachelor of Science in Computer Science	2025
University of Ibadan	

Certifications:

Software Development.	2026
TS Academy	
OCI Certified AI Foundations Associate .	2025
ORACLE	
Generative AI Professional Certificate.	2025
SAIL Innovation Lab	
Data Science With Python.	2024
INGRYD Academy	
Data Analytics Professional.	2023
Google	

Programming Languages

- JavaScript
- Python
- PHP
- SQL
- HTML & CSS

Frameworks & Libraries

- Express.js & Node.js
- React & React Native
- Numpy & Pandas
- Vue
- Bootstrap & Tailwind CSS

Work Experience

Junior Data Analyst Intern | Tata Group – Remote Internship Program | 2023

- Collected, cleaned, and analyzed structured datasets using Python (Pandas, NumPy) and SQL to support data-driven decision-making.
- Conducted exploratory data analysis to identify trends, anomalies, and performance gaps
- Built analytical reports and dashboards to monitor key performance indicators.
- Presented findings in stakeholder-friendly formats, translating data into actionable recommendations.

Machine Learning Developer | Tech Analytics Limited | 2024 – 2025

- Designed, developed, and evaluated machine learning models for predictive and analytical tasks in a remote capacity with over 80% accuracy based on available metrics .
- Built supervised learning models using Scikit-learn and TensorFlow, applying data preprocessing, feature engineering, and model evaluation techniques.
- Assessed model performance using metrics such as RMSE and R^2 , ensuring statistical reliability and reproducibility.
- Managed projects independently while, documenting experiments clearly and collaborating via Git-based workflows.

Software Developer | Freelance | 2025 – Present

- Developed full-stack web applications using JavaScript, Python, PHP, and MySQL, improving operational efficiency through workflow automation.
- Utilized AI-assisted development tools to automate repetitive coding tasks, optimize debugging, and enhance code quality, reducing development time by 90%+.
- Engineered secure relational databases and RESTful APIs to support scalable, maintainable, and production-ready applications.
- Collaborated with stakeholders to deliver business-aligned software solutions using modern software development practices, Git version control, and structured testing.
